

IN THE WRITTEN DESCRIPTION

Please rewrite the paragraph found at Page 10, lines 7-12 as follows:

The manufacturing computer C_M determines if the shoes represented by the customized order form are scheduled to be manufactured as part of the standard process. If so, the customer may be sent an estimated time of delivery. If not, the data from the customized order form is used to manufacture the shoes according to the order form in a custom run. The manufacturing computer C_M may send the user an estimated delivery time, and the ordered shoes are delivered to the customer.
